

Transferring Your Camera Images Pictures

First make a new folder on the desktop named after your email address i.e. fredsmith@hotmail.com

This document is based on using a Canon camera it may differ slightly for other makes of camera, but the principle is the same.

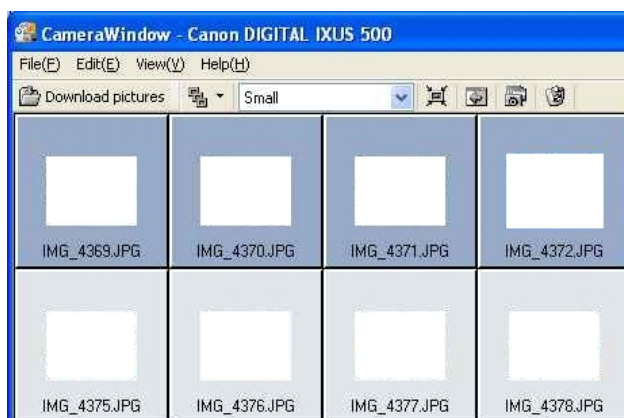

Connect your camera to your computer via USB or you may have a card reader installed in your pc (see below).

See below. If you have not installed the software supplied with your camera.

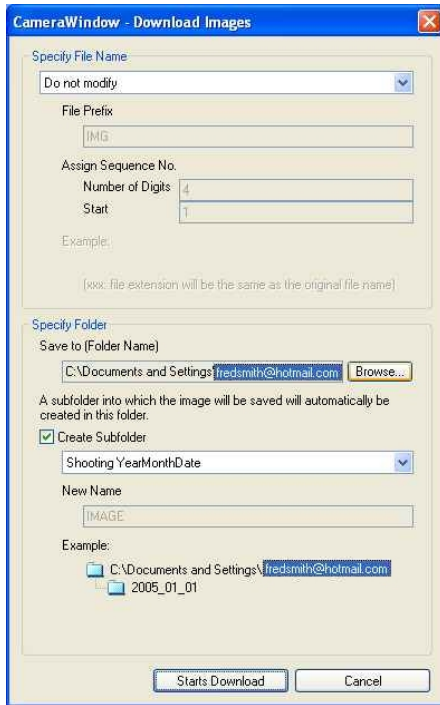

Click the “ let me select “ option.

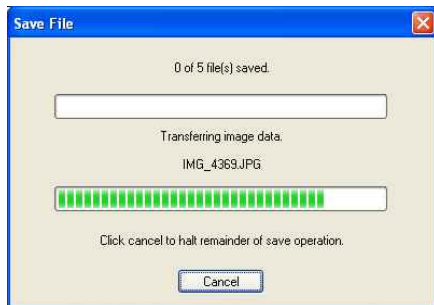

Highlight your files by holding down the shift key on your keyboard and click each image required with your mouse.

Select download images from the menu bar.

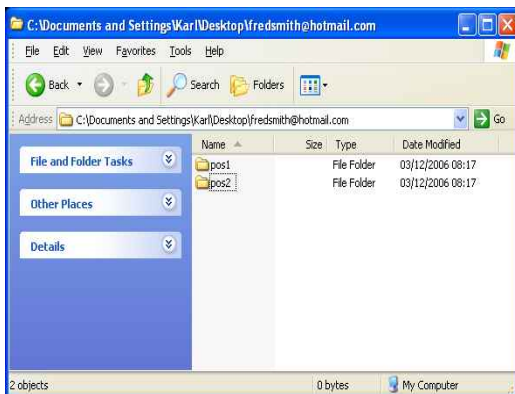

Select the browse button and go to the folder you created named after your email account. fredsmith@hotmail.com

Click “ start downloads “ button and transfer images.

You should see a window similar to this one

Once the images are transferred

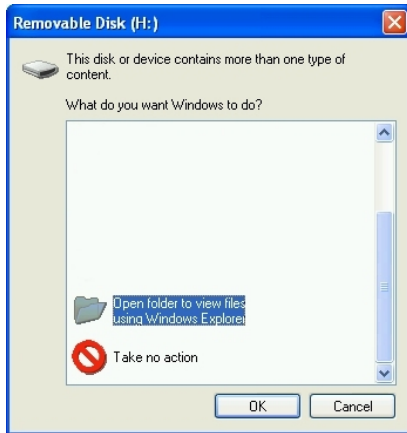

Select your folder from the desktop and sort images into folders as required for each position shot.

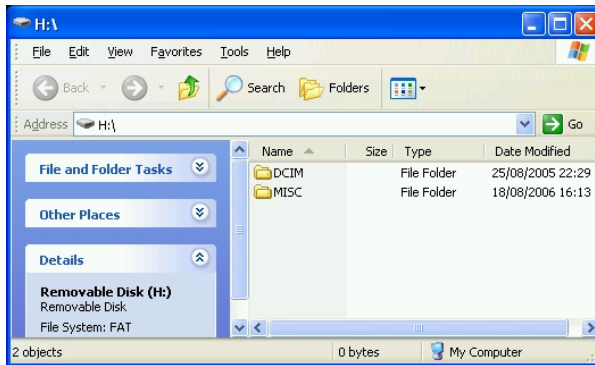

When you're finished the folder should look something like this depending on the amount of positions you are sending us.

Once completed please see the transferring images to Skyshot document.

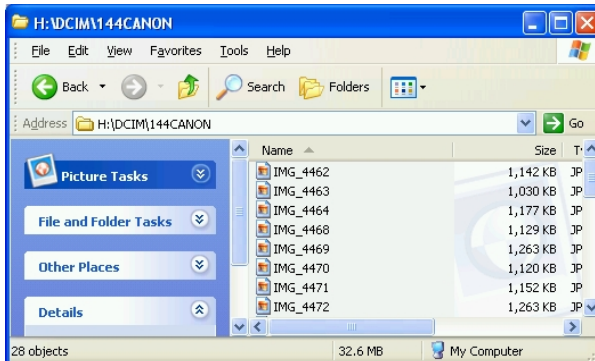

If you have not installed the software supplied with you camera

Connect your camera to your computer via USB or you may have a card reader installed in your pc – if so remove your memory card from your camera and slot into your pc.

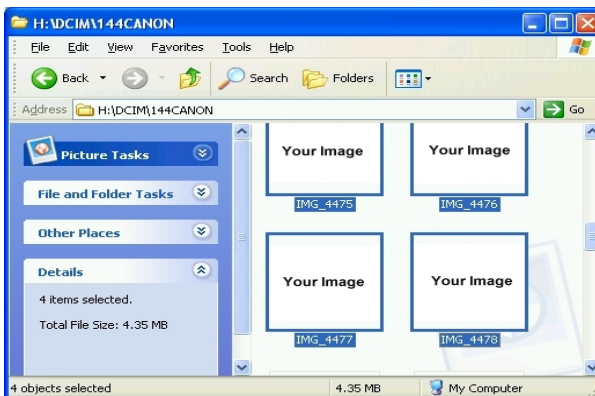

Select the folder named DCIM or similar relating to your camera.

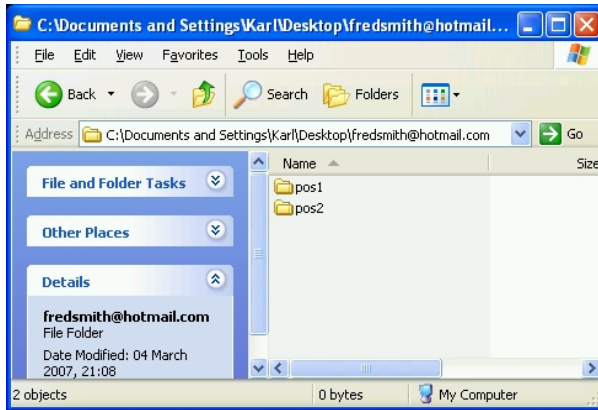

You will now see your camera images and can select the required files.

Changing the view to thumbnails in the windows view menu will help you to select the correct images, for each position.

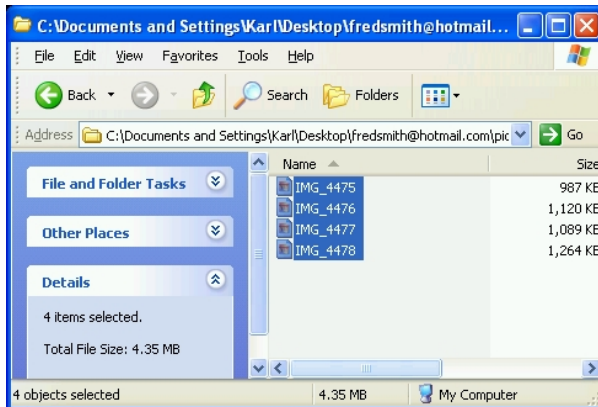

Highlight your images by holding down the shift on your keyboard and select images with your mouse by clicking each required image

Then select copy from the edit menu

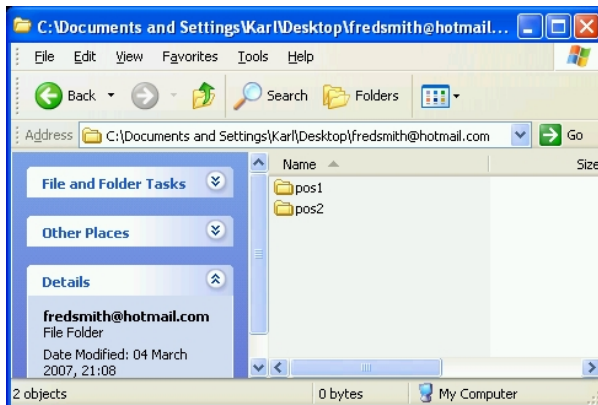

Now open the folder you created earlier called after your email address fredsmith@hotmail.com

Right click your mouse inside the folder and select paste this will copy the images from your memory card / camera to this folder

Your pos1 folder should look something like this.

Changing the view to thumbnails in the windows view menu will help you to confirm you have the correct images, for each position.

Depending on the amount of positions you are sending us your folder should look something like this.

Once completed please see the transferring images to Skyshot document.
